

# TOUCH & FORCE

*Any object becomes an  
enhanced touch device :*

Nanomade brings the Touch  
experience to another level. New  
Touch interactions, new designs, new  
features are unleashed with a level of  
performance that can hardly be done  
by existing competitors.

functionality

## Touch & Force

*Safety:* prevention  
against unintentional  
activations

> *capacitive touch  
sensor:*  
detects finger's  
presence

> *resistive force sensor:*  
threshold to validate  
an action

**Nanomade expands the interactive  
experience far beyond touchscreen.**

Multi-material compatible, 3D shape  
compatible, flexible, suitable for both small  
and large surfaces, our tactile and force  
solutions can be integrated everywhere, for  
every usages.
